Molecular Biology and Evolution (ISSN 0737-4038) is a peer-reviewed journal published twelve times a year by Oxford University Press for the Society for Molecular Biology and Evolution.

Molecular Biology and Evolution (MBE) publishes research at the interface between molecular and evolutionary biology. The journal publishes molecular evolutionary patterns, processes, and predictions at all levels of taxonomic, functional, genomic, and phenotypic organization. It also publishes new and improved methods, resources, and theories that are critical for advancing the molecular evolutionary research. MBE does not publish manuscripts containing largely descriptive work, confirmatory research, and discoveries with a limited scope or impact.
